The Mobile Gaming and Crypto Landscape

The gaming industry is booming, generating $300 billion annually, with a staggering 72% coming from mobile games. Over 1.6 billion people worldwide, from various backgrounds and ages, enjoy mobile gaming, and this number is expected to reach 1.9 billion by 2028. With over 700,000 mobile games available on Apple Store and Google Play, it's clear that mobile gaming is a massive and growing industry.

The popularity of mobile games is easy to understand. Almost everyone has a smartphone, making these games highly accessible. Whether you're waiting in line, taking a break at work, or relaxing at home, you can dive into a game anytime, anywhere. The variety of games available—from puzzles and action to strategy and educational games—ensures there's something for everyone.

Mobile games are designed for quick play sessions, perfect for busy schedules. Many are free or affordable, making them accessible to a wide audience. Social interaction also boosts their popularity, with many games offering multiplayer modes to connect with friends and family. Developers keep players engaged with constant updates, new features, and events, making mobile gaming a continuously evolving experience.

The Mobile Gaming and Crypto Landscape

Cryptocurrencies are making a significant impact on the gaming scene, merging technology and entertainment. Here are some trends crypto has introduced:

1. Play-to-Earn Games: Earn cryptocurrency just by playing.
2. NFTs in Games: Own and trade unique digital collectibles.
3. Crypto Rewards: Earn cryptocurrency for milestones and events.
4. Decentralized Marketplaces: Trade in-game items securely without middlemen.
5. Funding and Development: Raise funds through Initial Game Offerings (IGOs) by selling in-game tokens or NFTs before the game's release.

Cryptocurrencies and gaming have brought together diverse audiences, bridging the Web2 and Web3 worlds. While this fusion offers exciting opportunities, it also presents challenges for newcomers to the Web3 space.

Challenges in the Web3 Industry

Games are a fantastic gateway to introduce billions to the Web3 world. However, Web3, with its exciting potential, can be complex and daunting for newcomers. Transitioning Web2 users to Web3 is a gradual process that requires significant effort and isn't always successful.

Web3 technologies often involve understanding blockchain, wallets, and cryptocurrencies, which can be a barrier for many. Additionally, Web3 apps typically suffer from poor user experience (UX) compared to traditional apps, making adoption challenging for mainstream users.

The Web3 ecosystem consists of various blockchains and protocols that don't always integrate seamlessly, complicating the user experience across different platforms.

This is where Telegram mini-apps shine, offering an ideal solution to bridge the gap between Web2 and Web3, making the transition smoother and more accessible.

Crypto Mass Adoption through Telegram Apps

Why Telegram? Telegram has become a premier platform for communication and interaction, boasting over 950 million users. This makes it one of the largest social media platforms, offering immense potential for brand exposure.

A Telegram mini-app is an online application built and operated directly within Telegram, providing numerous advantages for developers and the community, such as:
- An open-source protocol between wallets and apps (TON Connect)
- Various monetization options, including advertising, subscription models, and in-app purchases
- Bot interaction
- Community development for developers
- Integrated payments
- Seamless integration with TON wallet

These benefits are why Hamster Kombat was developed on Telegram, with more exciting developments on the horizon.

Utilizing mini-apps to engage audiences in the cryptocurrency world offers significant advantages. Mini-apps provide a convenient way to communicate with users and deliver information about cryptocurrencies, ICOs, blockchain, and other crypto-related topics. They also offer access to various services, such as cryptocurrency wallets, crypto games, crypto exchanges, and other useful tools.

Additionally, mini-apps can be leveraged for marketing campaigns, contests, giveaways, and other activities that promote audience engagement and participation. Their ease of use and accessibility across multiple platforms help expand the user base and maintain engagement with cryptocurrency topics.

Crypto Mass Adoption through Telegram Apps

Finally, mini-apps enhance the transparency and security of user interactions with cryptocurrency services by providing convenient and secure methods for exchanging information and digital assets. This simplifies and improves the engagement of mass audiences in the cryptocurrency world.

We are creating a platform for crypto games on Telegram and are confident that our games will attract over 100,000,000 users to the blockchain within the next year. Over 1 million users have already joined, underscoring why Catid Paws was built on Telegram.

Gameplay and Narrative

Catid Paws is a fun and enggaging web app where you swipe the screen to earn coins. Build and upgrade your virtual cat paradise, develop strategies to boost your passive income and compete with friends to climb the ranks.

In this game, players are required to increase their Paws Game balance, complete daily combos and ciphers, and earn daily rewards—all to maximize their passive income, which can be swap for $Paws.

This system simplifies the gameplay process for users—they don't need to spend their days swiping the screen but rather choose which tasks to perform or what to do to multiply their income.

Catid Paws also has a highly efficient referral system. By inviting your friends, you not only increase your revenue but also get to build and manage your earnings alongside your closest friends!

Gameplay and Narrative

Catid Paws offers an exhilarating gameplay experience with 9 dynamic swipe levels, designed to ignite competitive spirit and enable users to earn substantial $PAWS rewards based on their ranking. Beyond the thrill of the game, Catid Paws fosters community engagement by encouraging users to form "Cat Families." These groups unite members under a shared vision and mission, ensuring that everyone collaborates towards common goals. As a result, all "Cat Family" members receive $PAWS rewards, promoting a strong sense of unity, teamwork, and collective achievement. Join Catid Paws today and be part of a vibrant, rewarding community!

NFTs (Non-Fungible Tokens)

In the Catid Paws project on Telegram mini apps, NFTs (Non-Fungible Tokens) play a crucial role in enhancing user experience and adding value. Users can mint and collect unique NFTs, which offer various in-game benefits such as access to exclusive levels and increased $PAWS rewards. These NFTs not only serve as personalized avatars but also act as tools to boost interaction and engagement within the Catid Paws ecosystem. By integrating NFTs, Catid Paws creates a more immersive and rewarding environment for its community members.

System Reward

At Catid Paws, we have designed an innovative reward system for all our users. Our primary goal is to provide a tangible source of passive income that not only enhances users' financial well-being but also encourages growth and engagement within our community. By participating in our platform, users can earn various exciting rewards that contribute to their financial stability.

Moreover, we are committed to creating a dynamic and thriving community. Every user who joins Catid Paws becomes part of a supportive and mutually beneficial ecosystem. We believe that by offering the right incentives, we can build a strong and sustainable community where every member feels valued and motivated to continue participating.

Tokenomic and Public Sale

Important Announcement: Catid Paws Tokenomics Published!

What is $PAWS? $PAWS is a utility and governance token that will be the heart of the Catid Paws ecosystem. With $PAWS, you can participate in various activities such as staking, gaming, and voting on key community decisions. In return, you will receive exciting rewards, including third-party utility tokens or virtual in-game prizes.

$PAWS Token Distribution:
- Private Round: 8%
- KOL Round: 7%
- Public Round: 10%
- Liquidity: 32.5%
- Airdrop: 32.5%
- Early Contribution: 10%

Why is This Important? Our carefully designed distribution model ensures sufficient initial circulation to support ecosystem growth while maintaining long-term momentum.

Tokenomic and Public Sale

We are thrilled to announce the early public sale offer to all Catid Paws users! We are offering four exclusive categories: Crab, Dolphin, Shark, and Whale. To become a Crab, you only need to purchase 20 TON for $PAWS. For Dolphin, the requirement is 50 TON, while Shark requires 250 TON, and Whale requires 500 TON. Each category comes with its own set of unique benefits designed to enhance your experience in the Catid Paws ecosystem.

By joining the public sale in the CatidPaws ecosystem, you can enjoy exclusive benefits that you simply can't miss! Get free access to our high-security Web3 Vault with no penalties during the pre-registration phase. This Vault is designed to protect your $PAWS tokens from offline penalties and offers a daily bonus of 0.5% until registration. Additionally, you have the flexibility to transfer PAWS tokens from your wallet to the Vault, ensuring your assets are secure and continuously growing.

Tokenomic and Public Sale

Moreover, participants will gain early access to crucial project information, allowing you to stay ahead of the curve and make informed decisions. You'll also have the opportunity to join the exclusive Early Contributors group, where you can connect with other key members of the community and share insights. This group is a valuable resource for networking and staying updated on the latest developments within the Catid Paws ecosystem.
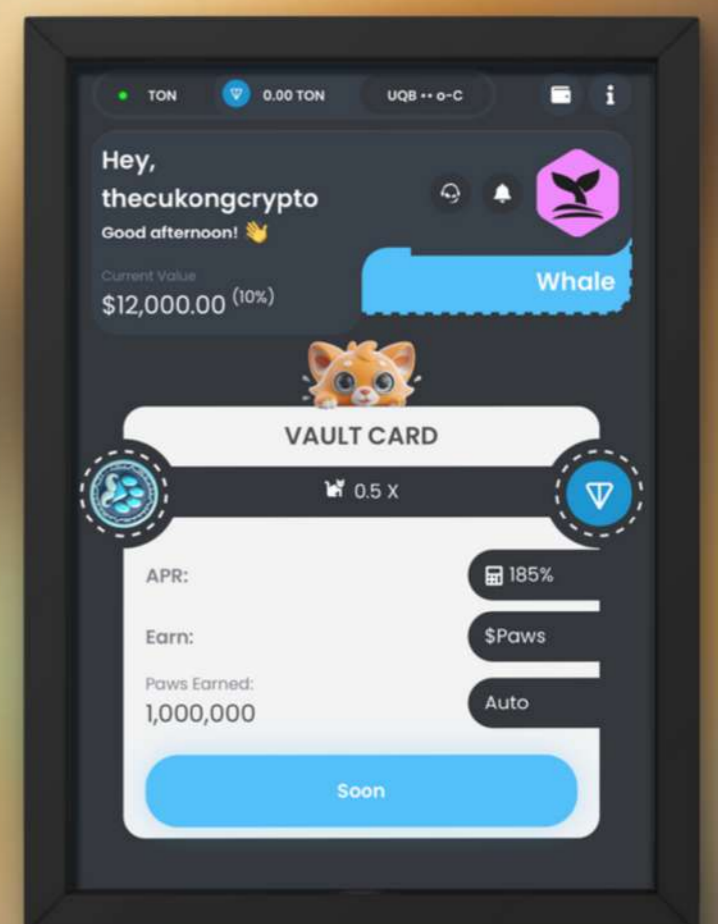

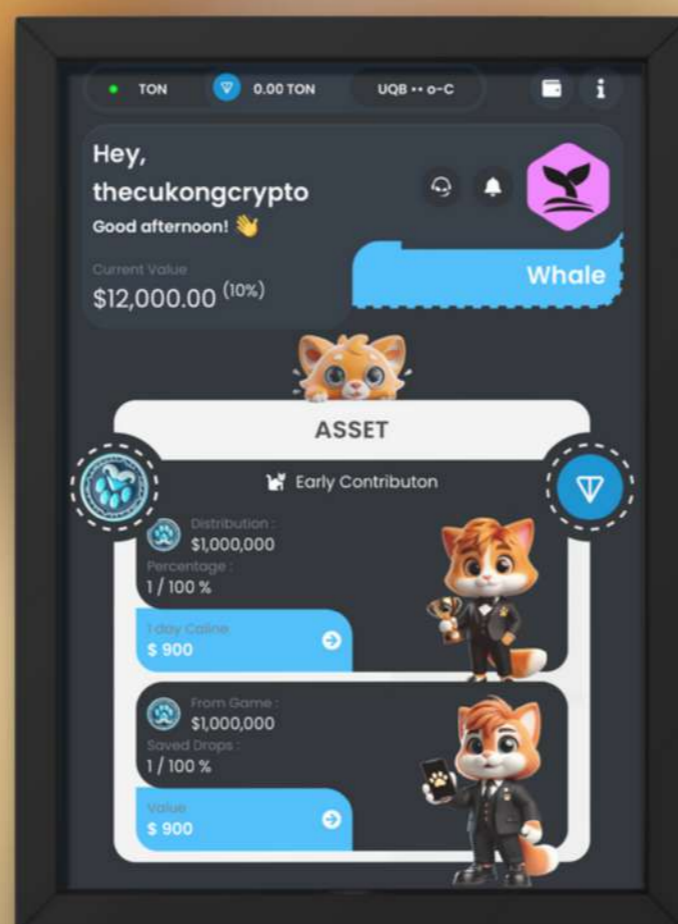

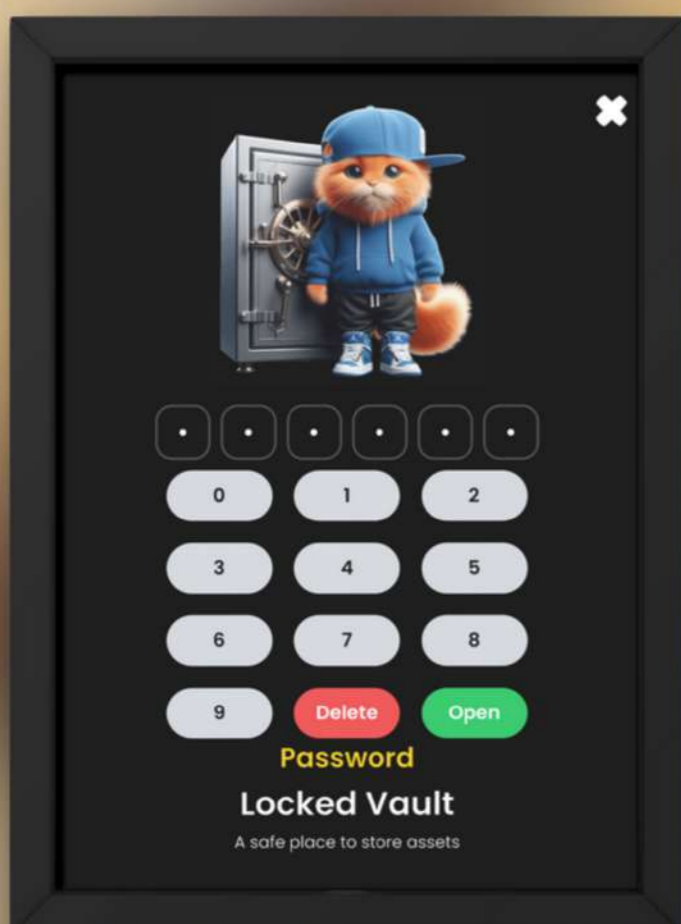

Finally, securing a position equal to venture capital with a purchase in TON according to your category ensures that you are not just a participant but a significant stakeholder in the Catid Paws revolution. This limited offer is available only to a select few users, so don't miss out on this incredible opportunity. Be part of the Catid Paws revolution and enjoy the numerous benefits that come with it!

Vault

The Vault in the Catid Paws ecosystem is a cutting-edge feature designed using advanced Web3 technology, ensuring top-notch security for all users. Its primary function is to safeguard your $PAWS tokens from offline penalties, which can occur if you are inactive for a certain period. By storing your tokens in the Vault, you can rest assured that your assets are protected, maintaining their value and security.

Moreover, the Vault offers an automatic daily reward system, providing a 0.5% bonus on your stored $PAWS tokens until the token is officially listed. This feature not only incentivizes users to keep their tokens in the Vault but also ensures a steady growth of their assets over time. The daily rewards are a testament to our commitment to providing tangible benefits and enhancing the user experience within the Catid Paws ecosystem.

In addition to its security and reward features, the Vault also allows seamless transfer of $PAWS tokens from your wallet to the Vault. This flexibility ensures that users can easily manage their assets and take full advantage of the Vault's benefits. By integrating these functionalities, the Vault becomes an essential tool for all Catid Paws users, promoting a secure, rewarding, and user-friendly environment.

Penalty Rules

$PAWS is the main token of the Catid Paws game, since there are so many users and we will adjust it to our teconomics, I as a developer apply penalty rules for those who are inactive.

Penalty : The entire number of paws chains that a user has will be reduced by the percentage of days he is not online, this is done so that the paws chain becomes a valuable token.

- 1 Days off = 10%
- 2 Days off = 20%
- 3 - 7 Days off = 30%
> 7 Days off = 100% (all $Paws chain gone)

Note : Penalty rules, if the user login last at 2pm, and the next day logs in again at 3pm then the penalty will be reduced, so this is a game of strategy and discipline.
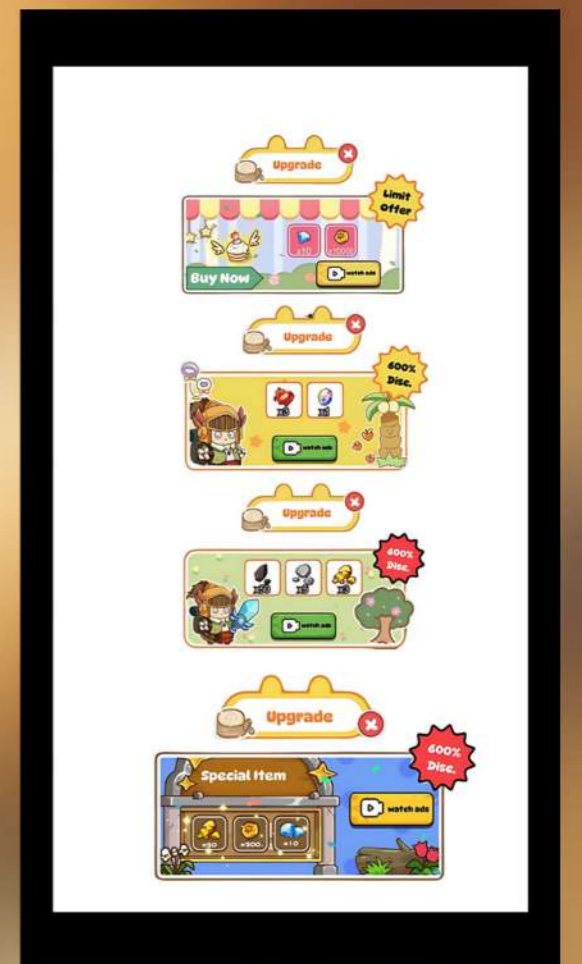

Enchanting Hero Survivors

In this mysterious world, each hero card unveils intriguing stories, unique characters, and unforgettable quests. Every hero has a rich background and special abilities that will lead you through adventures filled with surprises and challenges.

Immersive gameplay and stunning visuals are at the heart of the Catid Paws experience. We have meticulously designed every element to ensure that each moment in the game feels alive and captivating. From breathtaking graphics to deep storylines, every aspect of this game is crafted to provide an unforgettable experience for players.

In addition to offering incredible entertainment, Catid Paws also has exciting monetization potential. With various ways to earn and trade hero cards, players can build their collections while participating in a thriving community. We believe that Catid Paws will not only be a fun game but also a platform that connects players from around the world in an epic and unforgettable adventure.

Roadmap

June 2024

- Basic game Catid Paws
- Season 1 (Pretest-Game)
- Add Bonus system

July 2024

- Season 2 (Bug Finder)
- Zone,Task Daily Combo
- Inegrate Ton Blockchain

August 2024

- Season 3 (Final Season)
- Add Swap, Booster, Market & Cat's Family
- NFT Catidpaws Hero

September 2024

- Create Tokenomics $PAWS
- 1 M Users
- Release Whitepapper

October 2024

- NFT Upgradable
- Partnership Event
- Release Stage Launch Token

Upcoming

- Achievements
- Implementing tech for the largest AirDrop
- AirDrop tasks
- TGE and AirDrop distribution
- AppStore, Google Play Store apps
- Live events
- Time-limited events
- And much more
